

Appendix 5: Evaluation Survey

We are asking everyone participating in the Community Jury about sharing general practice data for research in Australia to take this short survey before, midway and after the community jury.

The study is being conducted by the Australian Centre for Health Engagement, Evidence and Values (ACHEEV) at the University of Wollongong (UOW).

The survey should take no more than 15 minutes to complete and there are no right or wrong answers. Participation is voluntary and you can withdraw at any point.

This survey includes a few questions about using general practice data for research in Australia. This survey is identifiable, however all identifying information will be removed prior to the research team analysing the data.

If you don't wish to answer any question, you can just move to the next question.

The information collected will be treated in strict confidence.
